SOURCE Elektroprivreda.NEW HIGH-TENSION POWER LINES IN SERBIA

The "Elektro-Srbija" High-Tension Power Line and Substation Construction Enterprise of Serbia has thus far completed 21 high-tension power lines, while the wires are to be strung on three other high-tension power lines.

The 72-kilometer Petrovac-Svetozarevo line, the 38-kilometer Zvecani-Kosovo line, and the 30-kilometer line from Vreoci Zvecane via Zvecane to Stubline were completed in 1950. All the work, except the stringing of wires, has been completed on the 40-kilometer Rankovicevo-Uisce and the 30-kilometer Novi Sad-Cib high-tension power lines. Poles are now being erected on the Valjevo-Zvornik high-tension power line. This power line will transmit power from the future hydroelectric power plant at Zvornik to the antimony mine at Zajaca, and to industrial enterprises in Valjevo, Loznica, and surrounding cities. The 7-kilometer Kostolac-Bor high-tension power line is being reconstructed.

The "Elektro-Srbija" enterprise has also begun the construction of substations with a rated potential of 110 kilovolts, which have thus far been built only by the "Termomontaza" Federal Enterprise.
